Provision Map Writer. All you need to manage additional provision.

Provision Map Writer is more than just a powerful reporting tool. It also supports the strategic management of inclusion right across the school. Track money spent and staff hours. Log interventions and pupil involvement. Pinpoint which interventions are working, and which are performing sub-optimally.

- **Inclusion Register:** identify areas of need across the school
- **Prioritisation tool:** sort pupils into must, should, could priority levels for provision
- **Map planning tool:** assign interventions, pupils and staff to your map
- **Budget tool:** calculate money and time spent on interventions
- **Intervention database:** includes recommended interventions and facility to add your own
- **Map Menu:** choose from a range of formats and layouts to suit your school
- **Group and Individual Maps:** show provision for groups and individual pupils
- **Outcome tracking:** record and track the effectiveness of your interventions

Intuitive and easy to use

- Quick start embedded video shows you what to do
- On-screen manual and help buttons throughout the software
- Scheduled automatic pupil and staff data updates from SIMS.net
- Telephone support 8am-8pm Mon-Fri

Next Steps for Provision Map Writer

Planned product development includes:

Local Authority-wide analysis.

Local Authorities will have access to a summary website, "LA Inclusion Monitor", that provides a strategic overview for the whole authority through analysis of: the cost-effectiveness of provision and interventions; how resources are allocated to SEN pupils; strengths and weaknesses in provision.

With a dataset that draws on schools' Provision Map Writer data, the LA can monitor the effectiveness of its provision and ensure good practice across the whole authority.

The range of available features and analyses will allow LAs to customise the service according to local conditions and agreements with schools. Depending on the options chosen by the LA, the effectiveness and cost of provision can be analysed by many factors including, by school, by area, by pupil characteristics, by Wave of Support making this an extremely powerful tool for the management of authority-wide provision.

Parental reporting via SIMS Learning Gateway

A new Blue Hills provision mapping Web Part will be available for the SIMS Learning Gateway. This will provide parents with live online access to their child's Individual Provision Map, Reviews and other documentation produced by Provision Map Writer.

Future developments will support

- Local authority monitoring
- Parental engagement

Blue Hills Software

Blue Hills Software has been successfully providing specialised management software and support to thousands of schools for more than 10 years. Our aim is to combine innovative ideas and excellence in practice into practical web-based management applications.

Provision Map Writer is a web-based application for the strategic management of inclusion right across the school. IEPs in one place? Pupil data in another? Paperwork related to interventions in another? Difficulty joining-up this information into a cohesive, accountable picture of inclusion in your school? Provision Map Writer brings all this together into one powerful web-based application. The integration with SIMS offers automatic scheduled import of pupil and teacher information.
