inspire

A single login solution for your school

SIMS ID is the “Single Sign-On” solution from Capita SIMS. It makes running cloud services effortless providing teachers, staff and pupils with a single login from their desktop to their online services.

Your Identity. Your Data.

It's important that individuals can be confident in their online identity and that only the right people have access to their data. With SIMS ID you can have just this - consistent across a wide range of services.

Taking the data already in SIMS, SIMS ID provides you with a simple set of tools to enable you to manage all of your online services, whilst delivering your users a self-managed service through a simple Launchpad.

Key benefits of SIMS ID

For your staff and pupils:

- ✔ Only need to remember a single username and password for all your services connected to SIMS ID
- ✔ Ability for users to securely reset and manage their own passwords
- ✔ No need to re-enter passwords once you've logged into your network device
- ✔ Customisable Launchpad providing simplified, consistent access to your online services from any device
- ✔ Your SIMS timetable visible in your Google and Office365 calendar.

For the IT managers:

- ✔ Simple management of user identity across local and online services via a single admin portal
- ✔ Automatically pulls your data from SIMS to create your SIMS IDs in your chosen format
- ✔ Automatically provisions users and groups into integrated cloud services including Office365 or Google
- ✔ Minimises the effort of running your local Active Directory through automatic updates to your local users and groups
- ✔ Enforces centrally administered security policies, including disabling all services when a user leaves your service.

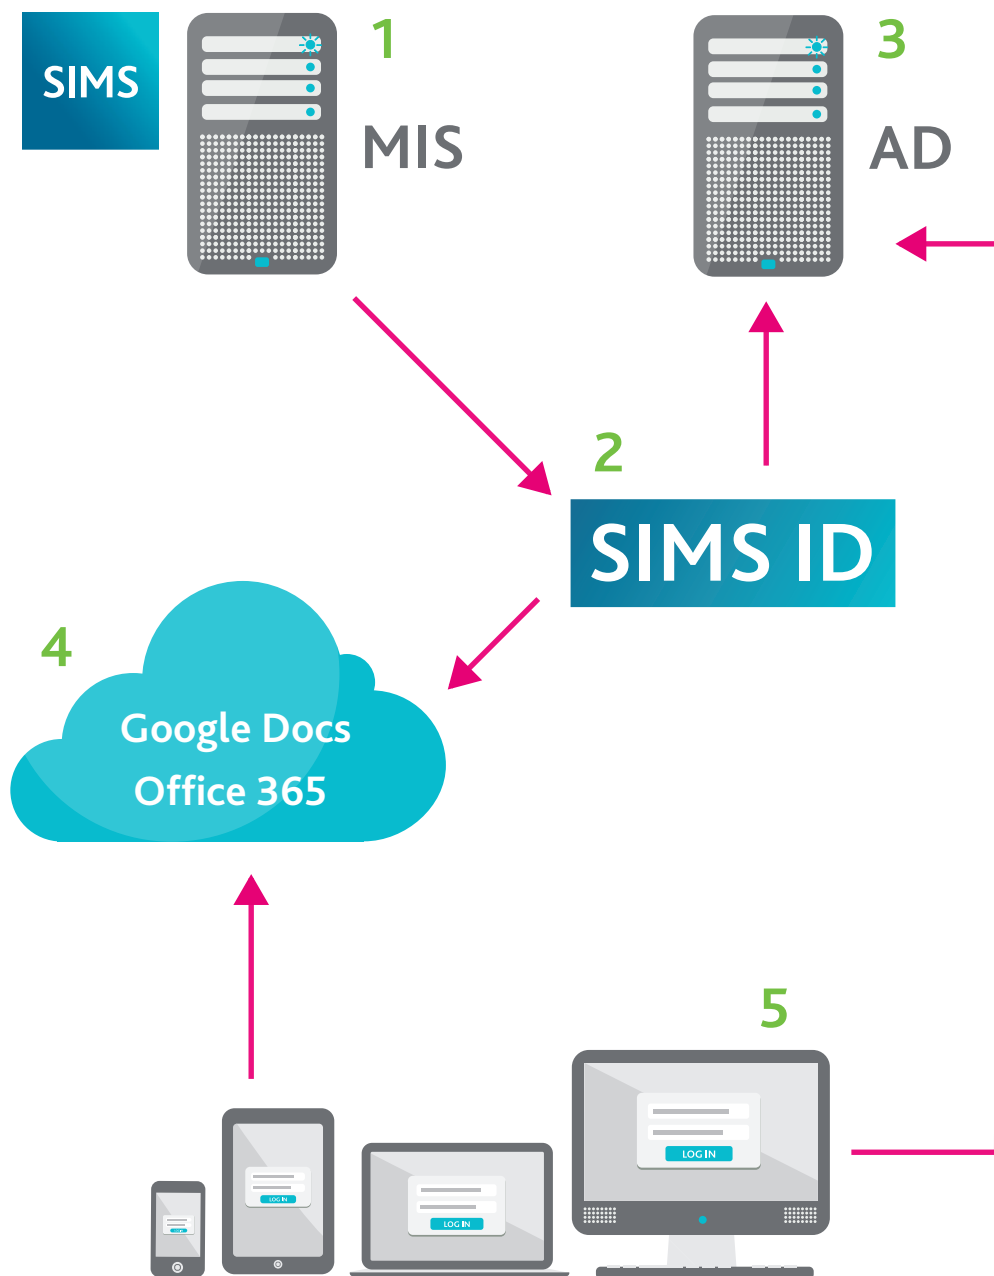

For the senior leaders:

- ✔ Reassurance that the right people have the right level of access to the right systems
- ✔ Confidence that when a user leaves and is deactivated in, or removed from, SIMS, all services managed by SIMS ID are automatically disabled and access to school data is revoked
- ✔ Free up your technical resources from repetitive admin tasks, like password resets and end of year changeover
- ✔ Clear audit trail for user's identity.

How it works

SIMS ID takes the information that your school has in SIMS and allows you to push this to your local Active Directory and deliver cloud platform services to give users a consistent identity across your school.

1. SIMS ID is driven by the data that is held in your school's MIS
2. A safe and secure SIMS ID login is generated for each member of staff and pupil
3. Logins will synchronise with integrated online services and your Active Directory
4. It is effortless to run multiple cloud services and integrates with Google and Office365
5. One username and password gives each user access to all of the school's systems they need

SIMS ID

- + Launchpad
- + O365 and/or Google integration
- + Automated MIS to SIMS ID provisioning
- + Local Active Directory account provisioning
- + Single sign-on from desktop to cloud services

SIMS ID LIGHT

If you're only looking to simplify access to your cloud services, then SIMS ID Light is for you. This service enables SIMS ID for your cloud services only, whilst still including seamless integration with SIMS.

- + Launchpad
- + O365 and/or Google integration
- + Automated MIS to SIMS ID provisioning
- + Single sign-on to cloud services

Your questions answered

Is SIMS ID hosted or installed?

SIMS ID is a hosted and fully managed solution. The advantage of this for schools, multi-academy trusts and local authorities is that it reduces the costs of managing and delivering a completely integrated ICT solution.

Is SIMS ID secure?

Yes, SIMS ID is secure. It contains a number of security features which allow you to grant appropriate access to relevant members of the organisation, ensuring only authorised personnel are able to make changes to a user or group.

Can I integrate with local resources and applications?

Yes. SIMS ID can be used to generate logins for any locally based services that work with Active Directory.

Can our school still use SIMS ID if we run SIMS locally?

Yes, you will still be able to use SIMS ID if you run SIMS locally, but you can only use single sign-on to access SIMS and FMS if you have the versions of those products that are hosted by us.
