

School improvement for SIMS support teams

from the SIMS School Improvement Programme

The School Improvement Programme has been *extremely helpful* to our SIMS support team. The bespoke sessions were specially tailored to our needs and have helped the team to confidently support our schools in their use of SIMS.

Lynn Warrington,
MIS Manager SIMS, Rochdale
Borough Council

Helping you support your SIMS schools to drive school improvement.

Supporting your schools with their school improvement priorities

In order to successfully implement and evaluate school improvement strategies, your supported schools need to be able to demonstrate the impact of their strategies on the outcomes for pupils. The SIMS School Improvement Programme runs bespoke sessions for both SIMS support teams and/or your supported schools, helping to ensure you are equipped to successfully support your schools in driving school improvement.

We will build you a specially tailored package which allows you to pick from a comprehensive range of topics to suit your individual needs.

What can be covered in your session?

You will be assigned a specialist consultant who has experience as a senior leader and a proven track-record of helping schools evidence their interventions and improvements. Your consultant can provide your support team or your schools with expertise on any of the following:

- Assessment – Early Years, KS1, KS2, KS3, KS4 and Post-16
- Updates to the Ofsted Handbook and the implications for schools of

recent Ofsted surveys

- Accountability for primary and secondary schools
- Safeguarding in education
- Teaching – performance management, CPD and best practice
- Curriculum - best practice in curriculum design and delivery
- Bespoke options – we can also cover something more specific at your request.

Sessions for SIMS Support teams

Strengthen the service you offer your schools by raising awareness amongst your SIMS support team members of current and emerging themes, developments and priorities in the world of education. A school improvement consultant will equip your team with a deeper understanding of school improvement requirements and how SIMS can help your schools to prove they are making a difference and meeting their statutory responsibilities.

Full day or half day options are available. We suggest picking a maximum of 4 or 5 of the above topics for a full day session, or 2 or 3 topics for a half day session.

Sessions for your supported schools

A school improvement consultant will co-deliver this session with you for your supported schools to attend. It is an excellent way for schools to gain a better understanding of current national educational issues. They will also learn how SIMS can support them in meeting their statutory responsibilities and implementing, monitoring and evaluating their school improvement priorities.

Full day or half day options are available. We suggest picking a maximum of 4 or 5 of the above topics for a full day session, or 2 or 3 topics for a half day session.
