DATA MANAGEMENT FOR AN ON-DEMAND WORLD

Every day more than 12,000 UK schools, including multi-academy trusts, colleges and universities rely on Redstor to protect their data through a fully automated, encrypted and secure data management service.

Redstor develops pioneering technology, which provides borderless visibility and on-demand access to all your data, wherever it is stored, through a single control centre. Suitable for education establishments of any size, backup, recovery, archiving and disaster recovery can be managed through a single control centre. This empowers your IT team whilst reducing costs, simplifying deployment, improving security and compliance and providing borderless visibility of data.

WHY CHOOSE REDSTOR?

BACKUP AND RECOVERY

Whether data is on-premise, hybrid or in the cloud, Redstor provides streamed, on-demand access. With unthrottled recovery, you can stream it in real-time to any device. In the event of data loss, you'll have your vital admin, curriculum and SIMS data up and running within seconds, not days. Data backup is fully automated to save you both time and money.

ARCHIVING

Primary storage solutions can quickly reach capacity and require more investment. But with up to 80% of data being made up of duplicate, redundant, obsolete or trivial data, isn't it better to utilise storage more efficiently? With Redstor's policy-driven, automated, cloud archiving, schools set a policy and data that hasn't been accessed in a given timeframe is archived securely to Redstor's UK data centres, solving the challenges associated with primary storage utilisation.

DISASTER RECOVERY

Ransomware is on the rise and with the threat to schools, who hold large amounts of sensitive and personal data, it is vital to be able to recover all data without paying a costly ransom. Redstor disaster recovery instantly protects both curriculum and admin data, ensuring protection from data loss or breach without the need to pay for stand-by hardware or a disaster recovery site. Recovery tests can be run on demand and recoveries are never throttled.

SEARCH AND INSIGHT

The world of regulation and compliance mounts and tightens with the threat of enforcement action, heavy fines and reputational damage. As data grows and becomes decentralised it can be an almost impossible task to keep track of what it is and where it exists. Redstor enables you to search and action the entirety of your data, as well as identify and mitigate data risks.

MICROSOFT OFFICE 365® PROTECTION

Cloud services, such as Microsoft Office 365®, often require additional protection, like backup, to ensure against loss of control, loss of data or corruption. O365 protection from Redstor helps schools to securely manage the protection of O365 data, set their own retention policies for data and address potential compliance issues. In addition, it ensures that all data can be recovered in the event of a deletion, accidental or otherwise, adding extra layers of security.

SCREENSHOTS

After a fire burnt the entire school site...

“This is my first time dealing with an incident of this scale, but I’m glad we took the precautions of choosing Redstor’s online data backup as it really takes away from the stress of trying to get the school up and running again.”

Daniel Sapseid,
IT Manager,
The Academy
Selsey (TKAT)

Central control centre

The central control centre allows you to manage backup, recovery, archiving and disaster recovery, providing borderless visibility of data.

Redstor search console

It is quick and simple to search the entirety of your data with seamless access.

YOUR QUESTIONS ANSWERED

How secure is the Redstor solution?

An expert in school data protection, Redstor offers secure, fully automated backup, recovery and archiving services to 12,000 schools nationwide, utilising UK-based data centres and a dedicated team of recovery experts. All data is fully encrypted, both in transit and at rest.

How can Redstor help with compliance?

Redstor are the only data management specialist to have completed the DfE and ICO's self-certification checklist for the provision of cloud services to schools, outlined in the DfE's departmental advice document.

How quickly can I get my data back?

Redstor's state of the art InstantData™ functionality removes the logistical challenge of moving large volumes of data over the internet by seamlessly streaming data as it's requested by a user or application. Giving you on-demand access and eliminating downtime.

How is the service priced?

Redstor pricing is designed to be transparent and predictable. There are no hidden fees, complex quotes or licensing costs, just a simple price per GB or TB. The amount of data you protect is the amount of data you pay for.

WHO BENEFITS AND HOW?

IT MANAGERS:

- Saves valuable time for IT leaders and their teams, allowing them to focus their time on other priorities
- Secure protection of critical data stored in UK data centres
- On-demand access and restores of data
- No management or resource overhead required

SENIOR LEADERSHIP TEAM:

- Ensures adherence to external and internal compliance policies
- Secure protection of critical data stored in UK data centres
- Full confidence that data is recoverable in the event of a disaster recovery scenario
- Instant access to critical data related to the running of the school
- Simple and transparent pricing

MATS:

- Ensure data is securely backed up across your trust
- Save time and money by managing the process centrally
- Keep your school running in the event of data loss
